VEST 1/4
COR. SEC.

1. The first step in the process is to identify the problem. This involves gathering information about the situation and the people involved.

2. Once the problem is identified, the next step is to analyze it. This involves breaking the problem down into its components and understanding the underlying causes.

3. After analyzing the problem, the next step is to develop a plan. This involves determining the steps that need to be taken to solve the problem.

4. The final step is to implement the plan. This involves putting the plan into action and monitoring the results.

5. Once the problem has been solved, it is important to evaluate the process. This involves reflecting on what worked well and what could be improved for next time.
